## IMPORTANT SAFETY RULES

Read, Understand and Follow All Instructions Carefully Before Installing and Using this Product.

# READ AND FOLLOW ALL INSTRUCTIONS

- Always supervise children and those with disabilities.
- Children must stay away from this product and electrical cord(s).
- Children shall not play with the appliance. Cleaning and maintenance must be performed by an adult above 18 years old, and who is familiar with the risk of electric shock.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Assembly and disassembly by adults only.
- The pump must be supplied through a residual current device(RCD) having a rated residual operating current not exceeding 30mA.
- Always unplug this product from the electrical outlet before removing, cleaning, servicing or making any adjustment to the product.
- Do not bury the electrical cord. Locate the cord where it will not be damaged by lawn mowers, hedge trimmers and other equipment.
- The supply cord cannot be replaced. If the cord is damaged the appliance should be scrapped.
- To reduce the risk of electric shock, do not use extension cords, timers, plug adaptors or converter plugs to connect unit to electric supply; provide a properly located outlet.
- Do not attempt to plug in or unplug this product while standing in water or when your hands are wet.
- Keep this product more than 2m away from the pool.
- Keep the plug of this product more than 3.5m away from the pool.
- Position this product away from the pool, so as to prevent children from climbing on it and accessing the pool.
- The pump must not be used when people are in the water.
- This product is for use with storable pools only. Do not use with permanently installed pools. A storable pool is constructed so that it may be readily disassembled for storage and reassembled to its original configuration.
- The appliance is intended only for household use.
- This product is intended to be used only for the purposes described in the manual!
- All the information pertaining to the installation, cleaning and maintenance, please refer to the below paragraphs of the manual.
- In order to avoid a hazard due to inadvertent resetting of the thermal cut-out, this appliance
  must not be supplied through an external switching device, such as a timer, or connected
  to a circuit that is regularly switched on and off by the utility.

## FAILURE TO FOLLOW THESE WARNINGS MAY RESULT IN PROPERTY DAMAGE, ELECTRIC SHOCK, ENTANGLEMENT OR OTHER SERIOUS INJURY OR DEATH.

These product warnings, instructions and safety rules provided with the product represent some common risks of water recreation devices and do not cover all instances of risk and danger. Please use common sense and good judgement when enjoying any water activity.

#### For portable Above-Ground-Pools only

#### PARTS REFERENCE

Before assembling your product, please take a few minutes to check the contents and become familiar with all the parts.

**NOTE:** Drawings for illustration purpose only. Actual product may vary. Not to scale.

### HOW THE CHLORINE IS GENERATED

This product is specially designed for above ground pools. It will destroy the bacteria, oxidize bather organics and control algae, which provide a safe, clean and comfortable swimming pool.

Common salt (sodium chloride) is made up of two elements, sodium and chloride. During the installation of your Saltwater System, a measured quantity of salt is dissolved in the pool water to make it slightly salty. The pool water flows through the Saltwater System 's electrolytic cell **(5)** to produce chlorine. The chlorine dissolves in the water and instantly starts destroying bacteria and algae. It also oxidizes all other organic materials.

The secondary electrolytic cell boosts the chlorination and sanitizing power for additional oxidation of water contaminants.

#### **PRODUCT SPECIFICATIONS**

Model:	ECO5220/5230	ECO6220/6230
Wattage:	65 W	125 W
Ideal Salt Level:	3000 ppm (parts per million)	3000 ppm (parts per million)
Secondary Cell Output Current:	500 mA	800 mA
Maximum Chlorine Output/hour:	5 grams/hour	12 grams/hour
Filter pump minimum flow rate:	700 ~ 3200 gallons/hour (2650 - 12112 liters/hour)	700 ~ 3200 gallons/hour (2650 - 12112 liters/hour)
Limited Warranty:	see "Limited Warranty"	

No tools are required for the assembly.

### **SETUP INSTRUCTIONS (continued)**

- 1. Go directly to step 2 if your pool is empty. If your above-ground-pool is filled with water, unscrew the strainer grids from the strainer connectors and insert the black hat-like plugs into the connectors, before installing the saltwater pool system.
- 2. Connect the adaptor A (1) to the electrolytic cell (3) outlet as shown in Drawing #1. Tighten securely.

- 3. Disconnect the water return hose from the filter pump connection and connect it to the adaptor A (1) on the Saltwater System with a hose clamp. (see Drawing #1)
- 4. Connect adaptor B (8) to the connector hose (7). Tighten securely. (see Drawing #1)

5. Connect adaptor B (8) to filter pump outlet (lower connection). Tighten securely.

6. Remove the black hat-like plugs that prevent water from flowing out of the pool. Now, return the strainer grids to the strainer connectors.

### **SETUP INSTRUCTIONS (continued)**

Connecting the system to pump and pool with 1-1/2" (38mm) connections/hoses: Pump and pool with 1-1/2" (38mm) connections do not require the adaptors A (1) or B (8). Install as follows: <u>Drawing #2</u>

SALTWATER SYSTEM

- 1. Go directly to step 2 if your pool is empty. If your above-ground-pool is filled with water, close the plunger valves before installing the Saltwater System.
- 2. Disconnect the water return hose from the filter pump connection and connect it to the Saltwater System outlet.
- 3. Connect the connector hose (7) to the filter pump outlet connection.
- 4. Open the plunger valves to allow the water to flow.

### **SETUP INSTRUCTIONS (continued)**

## Connecting the system to other types of pump (with different type of thread or no thread):

The Saltwater System can also be adapted to other filter pumps with different thread or those without a thread on the connection.

#### Connection to 1-1/4" (32mm) hose:

- 1. Connect one end of adaptor B (8) to the connector hose (7). Tighten securely.
- 2. Now, connect the other end of adaptor B (8) to the filter pump outlet. Tighten securely.

#### Connection to 1-1/2" (38mm) hose with clamp:

- SALTWATER SYSTEM
- 1. Connect the connector hose (7) to the filter pump outlet connection with a large hose clamp. Tighten securely.

## English

329

#### **SETUP INSTRUCTIONS (continued)**

#### Connecting the system to other types of pool

After you have connected the Saltwater System to the pump, connect it to the pool. This is depicted in Drawings #1 and #2.

Following are the common connection types:

#### Connection to 1-1/4" (32mm) connectors:

#### SALTWATER SYSTEM

- 1. Connect the adaptor A (1) to the electrolytic cell (3) outlet. Tighten securely.
- 2. The adapter A (1) is now fitted to the Saltwater System. The following step is to connect the water return hose to the adaptor A (1) with a hose clamp.

#### Connection to 1-1/2" (38mm) connectors without thread:

- 1. Connect the adaptor A (1) to the electrolytic cell (3) outlet. Tighten securely.
- 2. With the adaptor A (1) fixed to the Saltwater System, connect the water return hose to the adaptor, using a large hose clamp.

### English 329

### SALT & POOL WATER VOLUMES

#### • Which kind of salt to use:

For use within the European Union, salt must be from an authorized salt supplier registered with the European Chemicals Agency (ECHA) - visit echa.europa.eu. \*

#### Use only Sodium Chloride Salts

Use only sodium chloride (NaCl) salt that is at least 99.8% pure. It is also acceptable to use water conditioning salt pellets (the compressed forms of evaporated salt). However, it will take a longer time for them to dissolve. **Do not use iodized or yellow (yellow prussiate of soda) colored salt.** Salt is added to the pool water and the electrolytic cell uses the salt to create chlorine. The purer the salt the better the performance of the electrolytic cell.

#### • Optimum Salt Levels

The ideal salt level in the pool water is between 2500-3500 ppm (parts per million). The optimal level is 3000 ppm.

A too low salt level will reduce the efficiency of the Saltwater System and result in low chlorine production. A high salt level may generate a salty taste to the pool water (this may occur at a salt level above 3500-4000ppm). Too high a salt level may damage the power supply and cause corrosion to the pool metal fixtures and accessories. The Salt Table page of this manual, shows the correct dosage of salt needed. The salt in the pool is constantly recycled. The loss of salt is due only to pool water being physically removed from the pool. Salt is not lost due to evaporation.

#### • Adding Salt

- 1. Switch the filter pump on to start the water circulation.
- 2. Keep the Saltwater System turned off.
- 3. Determine the amount of salt to be added (see "Salt Table").
- 4. Evenly spread the proper amount of salt around the inside perimeter of the pool.
- 5. Avoid clogging the filter. Do not add salt through the skimmer.
- 6. Brush the pool bottom to speed up the dissolving process. Do not allow salt to pile up on the bottom of the pool. Run the filter pump 24 consecutive hours to thoroughly dissolve the salt.
- 7. After 24 hours and if all the salt is dissolved, turn on the Saltwater System, press in button until you hear a "beep", code "00" flashing and set the saltwater pool system to desired operating time (see "Operating Time Table").

#### • Removing Salt

If too much salt has been added, the unit will beep and display "Code 92" (see "Alarm Codes"). You will need to lower the salt concentration. The only way to do so, is to partially drain the pool and refill it with fresh water. Drain and refill approximately 20% of the pool's water until the "Code 92" disappears.

#### • Pool Volume Calculation

Types of Pool	s of Pool Gallons Cubic Met (pool size in feet) (pool size in r			
Rectangular	Length x Width x Average Depth x 7.5 Length x Width x Average			
Circular	Length x Width x Average Depth x 5.9	Length x Width x Average Depth x 0.79		
Oval	Length x Width x Average Depth x 6.0	Length x Width x Average Depth x 0.80		

\* The European Biocidal Products Regulation (BPR, Regulation (EU) 528/2012) requires that salt (sodium chloride) used as a precursor for on-site generation of active chlorine by electrolysis must be registered by the salt supplier with the European Chemicals Agency (ECHA), and such supplier must be included on ECHA's list of authorized suppliers (Article 95 list).

### **INTEX POOLS SALT TABLE**

#### INTEX POOLS CYANURIC ACID TABLE

Cyanuric acid is a chemical that reduces the loss of chlorine in water due to ultraviolet rays. To maintain the pool water clear and clean, and to maximize the performance of the device, add cyanuric acid to the pool. We recommend that the cyanuric acid level be maintained at approximately 1% of the salt, i.e. 100 Lbs (45 Kgs) salt x1% = 1 Lbs (0.45 Kgs) cyanuric acid. If the pool water is dirty, filthy or grimy, DO NOT add chlorine stabilizer (cyanuric acid) as this will slowdown the sanitation time of the device. Under this condition you must BOOST your pool water, refer to BOOST cycle steps. Once the pool water has been restored to clear and clean conditions you may add cyanuric acid.

		90% for Frame	y (Calculated at Pool and 80% & Oval Pool)	Cyanuric Acid Needed fo Startup 0.03g/L (30ppm)

14000	53000	-	-	-	6	7	8

#### **OPERATION INSTRUCTIONS**

#### 1. Turn on the filter pump.

#### 2. Start up the unit:

Plug the power cord into the electrical outlet and test the RCD (circuit breaker). Press on the electronic control station's LED, indicating that the unit is ready to be programmed.

#### 3. Set operating hours for Saltwater system:

With code "00" flashing, press i button to set the desired operating hours. See the "Operating Time Table" for the required operating hours related to each pool size. Pressing i will increase the time from 01 to 12 hours maximum. If you have selected too many hours keep pressing i to repeat the cycle. The built-in timer will now activate your Saltwater System, at the same time each day, for the number of hours you have set.

(1 to 12 hours max per cycle)

**NOTE:** The Saltwater System will not operate if the filter pump is not operating. Make sure to program your filter pump (or start it manually) for operation beginning 5 minutes before the saltwater system and finishing 15 minutes after the saltwater system.

#### 4. Lock keypad controls:

With the desired hour value showing, press 💿 button until you hear a "beep". A green "WORKING" indicator on the control panel will light up within a few seconds to indicate that the saltwater system has started chlorine production. Locking the control buttons into this setting prevents unauthorized changing of the operating cycle.

**NOTE:** If you forget to lock the keypad controls, the system will automatically lock it and start working 1 minute later.

#### 5. Readjust operating time if necessary:

The operating hours can be re-adjusted if necessary. Press 🐽 button until you hear a "beep" to unlock the keypad and the current programmed time will flash. Repeat steps 3 to 4.

## **OPERATION INSTRUCTIONS (continued)**

#### 6. Boost cycle

 First time installation, press and hold "BOOST" button for 5 seconds until the indicator lights up and the LED display "80". This indicates that the saltwater system has started more chlorine sanitizer production. You can press and hold the "BOOST" button for another 5 seconds until the indicator is off, which will cancel the Boost cycle.

The boost operating hours is 8 times the amount of time programmed into the system, i.e. if your saltwater system operating time is 2 hours, the boost procedure will run 8 x 2 = 16 hours. After boost procedure has been completed, the system will automatically switch to the normal working mode.

Once the boost is operating, check whether the filter pump operating hours have been set properly. For example, the boost operating time is 8 hours, the filter pump should be set to run for 8 hours at least. Increase the filter pump operating time if necessary.
 NOTE: If an Intex filter pump is attached to the system, set the pump switch to on "I" position.

• After a heavy rain or if the pool is dirty, press the "BOOST" button to shock the pool again.

#### 7. Stand-by/power saving mode:

- When the cycle ends, the green "SLEEP" indicator on the control panel lights up and the LED display flashes "93". The system is now in Stand-By mode. After a while, it shuts down and sets itself in a Power Saving mode. The system will automatically turn itself back on in 24 hours, starting its daily cycle of chlorine production.

#### 8. Electrode Self-Clean cycle:

 Press and hold solution for 5 seconds until the LED display flashes "10". Depending on your pool water calcium hardness level, press solution again to select the self-clean cycle time as below. Total of 3 settings: 14 hours, 10 hours and 06 hours.

Calcium Hardness	Self-clean cycle time
0 - 150 ppm	Reverse polarity every 14 hours
150 - 250 ppm	Reverse polarity every 10 hours
250 - 350 ppm	Reverse polarity every 06 hours

**NOTE:** The life of the cell varies depending on water conditions, pool usage and operating time of the device. Select 14 hours cycle time to maximize the life of the electrolytic cell if the calcium hardness level is up to 150 ppm. Manual routine cleaning and maintenance will further lengthen the life of the electrolytic cell.

 With the desired self-clean hours showing, press button to lock the keypad controls and the LED display will return to the normal operating time. The system will reverse the polarity of the electrode (5) every time according to the selected hours.

NOTE: If you forget to lock the keypad controls, the system will automatically lock it.

## SAVE THESE INSTRUCTIONS

### LED CODE CHART

LED Reading	Definitions		
80	Boost Mode		
00	Stand-By Mode (Start-up)		
01	Minimum Operating Hour (1 hour remaining)		
02	Operating Hours (2 hours remaining)		
03	Operating Hours (3 hours remaining)		
04	Operating Hours (4 hours remaining)		
05	Operating Hours (5 hours remaining)		
06	Operating Hours (6 hours remaining)		
07	Operating Hours (7 hours remaining)		
08	Operating Hours (8 hours remaining)		
09	Operating Hours (9 hours remaining)		
10	Operating Hours (10 hours remaining)		
11	Operating Hours (11 hours remaining)		
12	Maximum Operating Hours (12 hours remaining)		
90	Alarm Code (Low Pump Flow / No Flow)		
91	Alarm Code (Low Salt Level)		
92	Alarm Code (High Salt Level)		
93	Stand-By Mode (Operating Process finished)		
"BLANK"	No Power or "Power Saving Mode" waiting to start next Saltwater System cycle.		

### **IMPORTANT**

When Code "90" alarm is shown, ensure the timer of the filter pump is set one (1) hour longer than the Saltwater System. If the filter pump does not have a built-in timer, the filter pump needs to be turned on/off manually every day.

### SALTWATER SYSTEM STATIONARY MOUNTING

Some countries, especially in the European community, require the product to be secured to the ground or to a base in a permanent upright position. Check with your local authorities to determine if there is a regulation in your area regarding above-the-ground swimming pool filter pumps. If yes, then the product can be mounted to a platform using the two holes located in the base. See drawing below.

The product can be mounted on a cement base or onto a wooden platform to prevent accidental tipping. Total assembly must exceed 18kg.

Model ECO5220/5230

69 mm

Model ECO6220/6230

1. For model ECO5220/5230: The mounting holes are 6.4 mm in diameter and spaced 65 mm apart.

For model ECO6220/6230: The mounting holes are 6.4 mm in diameter and spaced 69 mm apart.

2. Use two bolts and lock nuts with a maximum of 6.4 mm in diameter.

English 329

#### MAINTENANCE

## **IMPORTANT**

Unplug the power cord before cleaning your system. Also close the plunger valves on your pool or insert the black hat-like plugs in the strainer opening to prevent water spillage. After completing all maintenance tasks, you must plug the power cord back in and open the plunger valves or remove the plugs.

#### **Flow Sensor Cleaning**

- 1. In a counter-clockwise motion unscrew the collar of the flow sensor (6) and remove it from the electrolytic cell conduit. See "Part Reference".
- 2. If deposits and debris are seen on the surface of the flow sensor, then use a garden hose to wash it off.

- **3**. If flushing with water does not remove the deposits, use a plastic brush to clean the surface and the hinge if necessary. Do not use a metal brush.
- 4. After the flow sensor has been inspected and cleaned, align the locator notch on the flow sensor to the connection ridge in the conduit. Now turn the collar in a clockwise motion, tightening the sensor back into its position. Do not overtighten.

#### **Electrodes Cleaning**

The electrodes have a self cleaning function incorporated into the electronic control's programming. In most cases this self cleaning action will keep the electrodes working at optimum efficiency. If the pool water is hard (high mineral content) the electrodes may require periodic manual cleaning. To maintain maximum performance, we recommend that you open and visually inspect the primary and secondary electrodes (5 & 4) monthly.

The following steps provide instructions on how to clean your cell.

#### Inspection and cleaning:

- 1. Switch off the unit, unplug the power cord from the electrical socket.
- For filter pumps with 1-1/4" (32mm) hose size To prevent water from flowing out of the pool, unscrew the strainer grids from the strainer connectors and insert the hat-like plugs into the strainer connectors.

For filter pumps with 1-1/2" (38mm) hose size - Turn both plunger valve handles fully clockwise until they stop. This closes the valve, prevents the water from flowing out of the pool.

### **MAINTENANCE** (continued)

3. Disconnect the 2 hoses from the Saltwater System, and attach the cell covers (9) to the inlet and outlet of the electrolytic cell (3).

4. Unscrew the collar of the flow sensor (6) and pull out the flow sensor from the electrolytic cell (3) housing.

5. Pour kitchen grade vinegar into the electrolytic cell housing (3) to immerse the electrodes. Soak for 1 hour.

6. Open one side of the cell cover (9), drain and properly dispose of the vinegar. Connect the hose which goes from the pool to the cell. Flush the electrolytic cell housing with the pool water.

7. Reverse steps 3, 4, 5 and 6 to reconnect the electrolytic cell.

English 329

### **MAINTENANCE** (continued)

#### **INTEX® TEST STRIPS (PACKED WITH THE PRODUCT)**

The Test Strips can test the "Free Chlorine", "pH", "Calcium Hardness" and "Total Alkalinity" levels at the same time. We recommend that you test the water chemistry weekly, and maintain the chlorine concentration at 0.5-3.0 ppm.

#### **Directions and Use**

- 1. Dip the entire strip into the water and remove immediately.
- 2. Hold the strip level for 15 seconds. Do not shake excess water from the strip.
- **3**. Now compare the strip pad to the color chart on the packaging label. If necessary, adjust the chemical level in the pool water. It is very important, to use the proper technique when testing the water's chemical level. Read and follow the written strip instructions carefully.

#### LONG TERM STORAGE

- 1. Disconnect the power cord from the electrical outlet.
- **2**. After the pool is completely empty, disconnect the Saltwater System from the hoses by reversing the installation instructions.
- **3.** Air-dry the unit before you store it. This might be a good time to visually inspect and clean the electrolytic cell.
- Store the unit and accessories in a dry place. The temperature should be controlled, between 32 degrees Fahrenheit (0 degrees Celsius) and 97 degrees Fahrenheit (36 degrees Celsius).
- 5. The original package can be used for storage.

### **POOL MAINTENANCE & CHEMICAL DEFINITIONS**

Preferred Water Chemistry Reading					
		Minimum	Ide	al	Maximum
Free Chlorine		0	0.5 - 3.	0 ppm	5.0 ppm
Combined Chlorine		0	0 pp	om	0.2 ppm
рН		7.2	7.4 -	7.6	7.8
Total Alkalinity		40 ppm	80 p	pm	120 ppm
Calcium Hardness		50 ppm	100 - 25	i0 ppm	350 ppm
Stabilizer (Cyanuric Acid)		10 ppm	20 - 40	) ppm	50 ppm
Consult with local swimming pool dealer for water treatment.					
Free Chlorine -	Is the chlorine residual present in pool water.				
Combined Chlorine -	Is formed by the reaction of free chlorine with ammonia wastes. Result if too high - Sharp chlorinous odor, eye irritation.				
	<ul> <li>A value that indicates how acidic or basic a solution is.</li> <li>Result if too low - Corroded metals, eye &amp; skin irritation, destruction of total alkalinity.</li> <li>Result if too high - Scale formation, cloudy water, shorter filter runs, eye &amp; skin irritation, poor chlorine efficiency.</li> </ul>				
	Indicates the degree of the water's resistance to change in pH. It determines the speed and ease of pH change, so always adjust total alkalinity before adjusting the pH level. Result if too low - Corroded metals, eye & skin irritation. Low alkalinity will cause the pH to be unstable. Any chemical added to the water will have an affect on pH. Result if too high - Scale formation, cloudy water, eye & skin irritation, poor chlorine efficiency.				
	Refers to the amount of calcium and magnesium dissolved in the water. Result if too high - Eye & skin irritation, difficulty balancing water and poor chlorine efficiency. Scale will form and will cause the water to become cloudy.				
Stabilizer - Stabi	Stabilizers extend the life of chlorine in swimming pools.				

• Do not add pool chemicals directly to the skimmer. This may damage the cell.

- Maintaining a salt and sanitizer level above the recommended range can contribute to the corrosion of the pool equipment.
- Check the expiry date of the test kit as the test results may be inaccurate if the kit is used after that date.
- If, due to heavy pool usage, it is required to increase the sanitizer level, then use a chemical based on trichlor, TCCA or dichloro.

### TROUBLESHOOTING GUIDE

PROBLEM	CAUSE	SOLUTION
INSUFFICIENT CHLORINE	<ul> <li>Insufficient operating hours of the Saltwater System.</li> <li>The salt level in the pool water is less than 2000ppm. This is insufficient.</li> <li>Chlorine loss due to intense sunlight exposure.</li> <li>The bather load has increased.</li> <li>Clogged or dirty electrolytic cell.</li> <li>High UV level exposure.</li> </ul>	<ul> <li>Increase the daily Saltwater System operating time. See "Operating Instructions".</li> <li>Check the salt level with the Test Kit. Adjust as needed. See "Salt &amp; Pool Water Volumes".</li> <li>Use a pool cover when the pool is not in use and/or when the unit is operating.</li> <li>Increase the daily Saltwater System operating time. See "Operating Instructions".</li> <li>Remove the cell for inspection, clean it if necessary. See "Maintenance".</li> <li>Cover the pool with a pool cover for 2 days with the device running and then test the water using the test strips.</li> <li>If the pool is clean and clear, add stabilizer to the water and then test the water with the device running.</li> </ul>
WHITE FLAKES IN THE WATER	<ul> <li>Excessive calcium hardness is present in pool water.</li> </ul>	• Drain about 20 to 25% of the pool water and add fresh water to decrease the calcium hardness. Inspect the electrolytic cell for scale buildup. Clean the electrolytic cell if necessary.
NO LED DISPLAY	<ul> <li>No power supply.</li> <li>RCD has not reseted.</li> <li>A power fuse has blown.</li> <li>LED failure.</li> </ul>	<ul> <li>Find out the switch and turn on.</li> <li>Reset the RCD.</li> <li>Contact Intex Service Center.</li> </ul>

Construction of the second sec	<ol> <li>LED display is off and the "SERVICE" light is on - the system does not power up.</li> <li>Caused by high humidity.</li> <li>PCB failure.</li> </ol>	<ul> <li>Household voltage is too high or too low (± 20%). Check the voltage is within the range stated on the device housing.</li> <li>Run the system during midday and avoid running it during dawn, foggy or raining time. Place a piece of tile or similar pad, 15"x15" (38x38 cm) in size, between the device and the ground to keep ground water evaporation away from the system.</li> <li>Contact Intex Service Center.</li> </ul>				
IMPORTANT If you continue to experience difficulty, please contact our Consumer Service Department for assistance. See separate "Authorized Service Centers" sheet.						

assistance. See separate "Authorized Service Centers" sheet.

### **CONTROL STATION REPLACEMENT**

Tools required: One (1) Phillips screwdriver

If only the control station **(13)** needs to be replaced as instructed by the service center, remove all the components inside the dotted frame and keep them in a safe place for later use. Once you have received the new replacement control station, reinstall all the components from the previous unit to the new control station.

#### **GENERAL AQUATIC SAFETY**

Water recreation is both fun and therapeutic. However, it involves inherent risks of injury and death. To reduce your risk of injury, read and follow all product, package and package insert warnings and instructions. Remember, however, that product warnings, instructions and safety guidelines cover some common risks of water recreation, but do not cover all risks and dangers.

For additional safeguards, also familiarize yourself with the following general guidelines as well as guidelines provided by nationally recognized Safety Organizations:

- Demand constant supervision. A competent adult should be appointed as a "lifeguard" or water watcher, especially when children are in and around the pool.
- · Learn to swim.
- Take the time to learn CPR and first aid.
- Instruct anyone who is supervising pool users about potential pool hazards and about the use
  of protective devices such as locked doors, barriers, etc.
- Instruct all pool users, including children what to do in case of an emergency.
- Always use common sense and good judgement when enjoying any water activity.
- Supervise, supervise, supervise.

English <sup>329</sup>

### LIMITED WARRANTY

Your Krystal Clear<sup>™</sup> Saltwater System has been manufactured using the highest quality materials and workmanship. All Intex products have been inspected and found free of defects prior to leaving the factory. This limited warranty applies only to the Krystal Clear<sup>™</sup> Saltwater System and accessories listed below.

This limited warranty is in addition to, and not a substitute for, your legal rights and remedies. To the extent that this warranty is inconsistent with any of your legal rights, they take priority. For example, consumer laws across the European Union provide statutory warranty rights in addition to the coverage you receive from this limited warranty: for information on EU-wide consumer laws, please visit the European Consumer Center website at http://ec.europa.eu/consumers/ecc/contact\_en/htm.

The provisions of this limited warranty apply only to the original purchaser and are not transferable. This limited warranty is valid for the period noted below from the date of the initial retail purchase. Keep your original sales receipt with this document, as proof of purchase will be required and must accompany warranty claims or the limited warranty will be invalid.

Krystal Clear<sup>™</sup> Saltwater System Warranty – 2 Years Electrolytic cells Warranty – 1 Year Hoses, Plunger Valves & Fittings Warranty – 180 days

If you find a manufacturing defect in the Krystal Clear<sup>™</sup> Saltwater System during the warranty periods noted above, please contact the appropriate Intex Service Center listed in the separate "Authorized Service Centers" sheet. If the item is returned as directed by the Intex Service Center, the Service Center will inspect the item and determine the validity of the claim. If the item is covered by the provisions of the warranty, the item will be repaired or replaced, with the same or comparable item (at Intex's choice) at no charge to you.

Other than this warranty, and other legal rights in your country, no further warranties are implied. To the extent possibly in your country, in no event shall Intex be liable to you or any third party for direct or consequential damages arising out of the use of your Krystal Clear<sup>™</sup> Saltwater System, or Intex or its agents' and employees' actions (including the manufacture of the product). If your country does not allow the exclusion or limitation of incidental or consequential damages, this limitation or exclusion does not apply to you.

You should note that this limited warranty does not apply in the following circumstances:

- If the Krystal Clear<sup>™</sup> Saltwater System is subject to negligence, abnormal use or application, accident, improper operation, improper voltage or current contrary to operating instructions, improper maintenance or storage;
- If the Krystal Clear<sup>™</sup> Saltwater System is subject to damage by circumstances beyond Intex's control, including but not limited to, ordinary wear and tear and damage caused by exposure to fire, flood, freezing, rain, or other external environmental forces;
- To parts and components not sold by Intex; and/or
- To unauthorized alterations, repairs or disassembly to the Krystal Clear<sup>™</sup> Saltwater System by anyone other than Intex Service Center personnel.

The costs associated with the loss of pool water, chemicals or water damages are not covered by this warranty. Injury or damage to any property or person is not covered by this warranty.

Read the owner's manual carefully and follow all instructions regarding proper operation and maintenance of your Krystal Clear<sup>™</sup> Saltwater System. Always inspect your product prior to use. This limited warranty will be void if use instructions are not followed.
